

Important Terminal Commands For macOS

- To turn off Apple's GateKeeper "security" feature:

```
sudo spctl --master-disable
```

- To prevent GateKeeper from re-arming:

```
sudo defaults write /Library/Preferences/com.apple.security  
GKAutoRearm -bool NO
```

- To ad-hoc code-sign an application:

```
sudo codesign -f -s - --deep /Applications/AppName.app
```
